

THE NEW HANS IV

- 10% WEIGHT REDUCTION
- EXTENDED SIZE OFFERINGS
- INTEGRATED PADS
- IMPROVED BELT RETENTION

hans

For years, the Hans III has been the go-to standard in the entry-level Frontal Head Restraint (FHR) market. Through innovation, our engineering team has set the bar even higher. We've reduced the weight and built a more ergonomic design, setting the stage for the new HANS IV.

COMFORT & WEIGHT SAVINGS

The HANS IV is engineered for maximum comfort and safety with custom-molded pads that lock securely into place and a unique foam compound for an ideal balance of comfort and support.

Improved leg geometry, taller side wings, and added friction material help eliminate belt slippage. Thanks to a smart redesign featuring integrated channels, the HANS IV sheds nearly 70 grams of weight without compromising protection, offering a lighter, more comfortable fit for every driver.

How To Measure

To find the right size for your HANS Device, measure around your neck above your shirt collar using a soft tape measure, or use a ruler to determine your neck diameter in the same area. Keep in mind that sizing can sometimes overlap between different options, so personal comfort should ultimately guide your choice. If you're a youth racer, consider selecting a size that allows room to grow while still maintaining a safe and secure fit.

HANS SIZE GUIDE (HANS III & HANS IV)

Neck Width	CM.	11	12	13	14	15	16	17	18	19
HANS III					LARGE					
				MEDIUM						
		YOUTH
